## 16.403 Fixed-price incentive contracts.

- (a) *Description*. A fixed-price incentive contract is a fixed-price contract that provides for adjusting profit and establishing the final contract price by application of a formula based on the relationship of total final negotiated cost to total target cost. The final price is subject to a price ceiling, negotiated at the outset. The two forms of fixed-price incentive contracts, firm target and successive targets, are further described in 16.403-1 and 16.403-2 below.
- (b) Application. A fixed-price incentive contract is appropriate when-
- (1) A firm-fixed-price contract is not suitable;
- (2) The nature of the *supplies* or services being acquired and other circumstances of the *acquisition* are such that the contractor's assumption of a degree of cost responsibility will provide a positive profit incentive for effective cost control and performance; and
- (3) If the contract also includes incentives on technical performance and/or delivery, the performance requirements provide a reasonable opportunity for the incentives to have a meaningful impact on the contractor's management of the work.
- (c) *Billing prices*. In fixed-price incentive contracts, billing prices are established as an interim basis for payment. These billing prices *may* be adjusted, within the ceiling limits, upon request of either party to the contract, when it becomes apparent that final negotiated cost will be substantially different from the target cost.
  - 16.403-1 Fixed-price incentive (firm target) contracts.
  - <u>16.403-2 Fixed-price incentive (successive targets) contracts.</u>
