(b) In addition to the information listed in (a) above, the following material and information is generally necessary in the course of processing a claim of patent infringement. If available, this identification should include documentation and drawings to illustrate the accused article or process in suitable detail to enable verification of the infringement comparison.
- (4) Names and addresses of all past and present licenses under the patent(s), and copies of all license agreements and releases involving the patent(s).
- (5) A brief description of all litigation in which the patent(s) has been or is now involved, and the present status thereof.

(11) Pertinent prior art known to claimant, not contained in the Patent Office file, particularly publications and foreign art.

In addition in the foregoing, if claimant can provide a statement that the investigation may be limited to the specifically identified accused articles or processes, or to a specific procurement, it may materially expedite determination of the claim.
