PGI 204.7303-1 General.

(a) The contracting officer will be notified by the requiring activity when a solicitation is expected to result in a contract, task order, or delivery order that will involve—

(1) Covered defense information; or

(2) Operationally critical support.

(b) The contracting officer shall—

(1) Ensure that the requiring activity provides a work statement or specification that includes the identification of covered defense information or operationally critical support consistent with paragraph (a).

(2) Ensure that the solicitation and resultant contract, task order, or delivery order includes the requirement (such as a contract data requirements list), as provided by the requiring activity, for the contractor to apply markings, when appropriate, on covered defense information.
